Dear Ms. Okafor,

Your bill for the service period September 1 - September 30, 2026 shows electricity usage of 2,940 kWh. This is 3.1 times your 12-month average of 948 kWh. The amount due for this period is $612.40, payable by November 3, 2026.

Under Section 14.2 of the Customer Service Rules, a customer who believes a charge is incorrect may file a billing dispute. To dispute this charge, return the enclosed Billing Dispute Response Form (page 2) no later than November 3, 2026. While a timely dispute is under review, collection activity on the disputed amount is suspended and no late fee will be applied to that amount. You must continue to pay any undisputed charges.

You may also request a meter accuracy test at no cost, and you may ask for a payment arrangement that spreads the balance over up to 6 months. If no dispute or payment is received by the due date, a late fee of 1.5% may be added and the account may be referred for collection after 30 days.

Return the form by mail to the address above or by email to disputes@maplewood-pw.example.

Sincerely,
Billing Review Team, Maplewood Valley Power & Water
